

OVERVIEW:

The majority of Christians are experiencing *untold pain, discouragement and spiritual impotence in their WorkLife*. They spend about half of their waking hours and have most of their relational influence at Work, yet most are unequipped and disconnected to God's purpose for their work.

As the leading voice in America on Faith and Work, WorkLife, Inc. *pioneered the first scalable and sustainable WorkLife Discipleship Process*. Inclusive of all fields of work and implemented in leading churches and organizations across the country, the process coaches and supports believers to practice a rhythm with God in their WorkLife. In essence, we empower people to practice an effective life at work.

WorkLife's Maestro, an Online Coaching System, is a *low cost, technology-based WorkLife Discipleship system, scalable to any level* while maintaining program fidelity and high quality, allowing costs to be significantly reduced. It is built on a holistic, well-defined theological framework, coaching people at the right time and right place, when and how they work.

The current economic disaster is compelling organizations to take immediate action to serve the WorkLife needs of people.

WorkLife implements its WorkLife Solution in partnership with local churches and corporations to produce measured results. *WorkLife's delivery model removes barriers to rapid user adoption* while still delivering a blended behavior transforming experience. Assessments, Coaching Tools and Resources from distinguished WorkLife practitioners and teachers are available at all times.

Maestro WorkLife Coaching System facilitates immediate WorkLife growth in a world absent of WorkLife support. WorkLife is extending its current service reach to help millions practice an effective WorkLife that glorifies God.

You can help grow this WorkLife impact by sponsoring this simple process in your organization or sharing with others.
